

Printing information:

- The complete curriculum consists of four data files:
 - Fall 2009 cover pages
 - Fall 2009 book large data file
 - Winter 2010 cover pages
 - Winter 2010 book large data file
- The cover pages are separate documents, two sided, which has color on the front of the page. The books are black and white. *[add reference to introduction?]*
- The large data file is a PDF file, intended to be printed double sided.
- Some pages are copies of copies so if it is possible to output directly from PDF to the print device, that will probably result in a better image.
- Every odd page should be a facing page. Every Lesson Title Page is an odd numbered “facing” page. As the book is open before you, it should appear like this:

- The PDF document should be printed with the following options:
 Documents and Markups
 Fit to Printable Area
 Rotate and Center
